The Resource Development Department thanks everyone for their collaborative approach to grant seeking in support of program development, enhancement and expansion. Through our collective efforts in 2004, MCC applied for more than $5 million in funding, much of which is still pending. This year’s luncheon celebrates the collaborative efforts of those who developed proposals in 2004, from inception to submission. Many of these initiatives required teamwork that not only crossed institutional divisions, but also included external partnerships.

I know that I echo the thoughts of many when I say that Manatee Community College truly cultivates an environment that inspires teamwork among colleagues. It is my hope that each year the community of grant developers will become even larger and the impact of our efforts will be multiplied.

Thank you very much.
