Made up of representatives from all four College divisions, the Resource Development Committee (RDC) meets monthly to facilitate the generation of ideas, the prioritization and approval of potential projects, collaboration across College units and the development of enduring connections with external partners.
The Resource Development Department and the Resource Development Committee are grateful to all those who have supported grant program development, enhancement, administration and expansion.

It can’t be said enough, but we would not be successful without the tremendous amount of teamwork, energy and creative thinking brought to these projects by all the players involved. With each new academic year or funding cycle, we see new ideas emerging, new resources being leveraged and new partnerships being nurtured.

Thank you very much for what you have contributed to this critical process.

Bradley W. Davis
Director, Resource Development
