

## SCF-Student Wireless Network Configuration and Connection

Students will be required to configure the WLAN client for the new SCF-Students wireless network connection.

- Choose SCF-Students from your wireless network options.
- You will be prompted to enter a new “Network key” or “password” when first connecting to the wireless network. The new “network key” or “password” is: **GoManatees!** Confirm key: **GoManatees!** (Be sure you have used upper case, lower case and special characters correctly.)
- After the key/password is entered and accepted, open your browser (IE/Firefox/Safari/Chrome) and you will see the login page.

The screenshot shows a Windows Internet Explorer browser window titled "SCF Guest Wireless Access". The address bar shows the URL "https://1.1.1.1/fs/customwebauth/login.h". The page content includes the SCF logo, the title "SCF Student Wireless Access", and several sections of text: "How to Log In:", "Note: Employees should connect to the SCF-Employees wireless network, and guests should connect to the SCF-Guests wireless network.", "Accessing the State College of Florida Network From Your Wireless Device", "Terms and Conditions of Use", and "Security Considerations". At the bottom, there is a login form with fields for "Username" and "Password", and a button labeled "I Agree with Policy Above".

- Enter your SCF userid and password (6 digit PIN) (The same user id and PIN used to access your SCFconnect account.) and choose “I Agree with Policy Above”. You will then connect to the network.
